

SUMMARY

- With a strong foundation in Python, SQL, Excel, Tableau and Power BI . Skilled in data cleaning, preprocessing, and feature engineering, I have hands-on experience in building and evaluating machine learning models. My knowledge of statistics, hypothesis testing, and probability helps in deriving meaningful insights from data. I am proficient in creating dashboards and visualizations that support decision-making. I have successfully completed Deloitte and British Airways virtual internships, where I worked on customer data analysis and predictive modeling. Through these experiences, I learned to translate data into actionable business recommendations. I am passionate about applying data-driven solutions to solve real-world business problems.

- Great Learning e-portfolio: <https://www.mygreatlearning.com/eportfolio/prince-jha>

KEY SKILLS

- Machine Learning: Supervised(Regression and Classification) and Unsupervised(Clustering) Learnings
- Data Visualization: Python, Numpy, Pandas, Matplotlib, Seaborn, PySpark, Databricks
- Data Engineering & ETL: ETL/ELT Processes (Extract, Transform, Load), Data Storage Technologies (Data Warehouses, Data Lakes), Data Loading (Structured & Unstructured: JSON, XML, APIs), SQL Database Connection with Python
- Data Analysis: Exploratory Data Analysis and Feature Engineering
- Data Reporting: Power BI, Tableau, Excel
- DBMS: MySQL
- Advance Analytics: Statistical hypothesis Testings
- Soft Skills: Teamwork, Good communications

ACADEMIC PROJECTS

- HOTEL BOOKING CANCELLATION PREDICTION**
Description: Built a machine learning model to predict Hotel Booking Cancellation categories using Logistic Regression, Random Forest, XGBoost, AdaBoost and model evaluation with accuracy of 86%.
Outcome: The best accuracy of approximately 86% is achieved from the Random Forest model.
Tools Used: Python, EDA, Machine Learning, Supervised Learning, Logistic Regression, K-fold Cross Validation, Naive Bayes, KNN, Random Forest, Decision Tree.
- CUSTOMER DATA PREDICTION**
Description: Developed a machine learning model to predict customer booking completion using historical booking data. Performed data cleaning, feature engineering, and exploratory data analysis to identify key booking patterns. Achieved high accuracy using Random Forest and XGBoost classifiers, providing actionable insights for improving booking conversions.
Outcome: The best accuracy of approximately 85% is achieved from the Random Forest model.
Tools Used: Python, EDA, Machine Learning, Supervised Learning, Logistic Regression, K-fold Cross Validation, Random Forest, Decision Tree.
- Data-Driven-Approach-to-Fund-Allocation-for-Help-International-NGO Public**
Description: Designed a data-driven solution to optimize fund allocation for Help International NGO based on country-specific development indicators. Conducted exploratory data analysis to identify regions with the highest need for financial support. Applied machine learning techniques to recommend strategic fund distribution, maximizing impact on global development goals.
Outcome: Developed a 0–100 scoring model using socio-economic indicators, with top 5 countries scoring above 85 indicating highest aid priority.

Tools Used: Python, Pandas, NumPy, Matplotlib, Seaborn, Unsupervised Learning, KMeans Clustering.

INTERNSHIP

Intern, Deloitte Virtual Internship

August 2025 – August 2025

- Analyzed and visualized data using Tableau dashboards and performed data cleaning, manipulation, and reporting in Excel to support business insights.

Skills: Excel, Tableau, Data Analysis, Data Visualization

Intern, British Airways Virtual Internship

Nov 2024 – August 2025

- Collected and analyzed customer data to build predictive models using **Random Forest and XGBoost**, achieving 85% accuracy and providing actionable recommendations to enhance business outcomes .

Skills: Python(Programming Language), Exploratory Data Analysis, Machine Learning, PowerPoint Presentation

HACKATHONS/OTHER CERTIFICATIONS

- Advance Excel for Business Analytics
- HackerRank SQL
- HackerRank Python
- Python for Data Science

EDUCATION

Course	Institution	Year	Remarks
Post Graduate program Data Science and Engineering	Great Lakes Institute of Management	2025	71%
Bachelor of Computer Application	Sidhu Kanhu Dumka University	2024	72.00%
12 th Std	New Horizon School	2022	74.00%
10 th Std	St Xavier's School	2019	70.00%

OTHER ACHIEVEMENTS

- Achieved 5-star proficiency in SQL on HackerRank.
- Completed the Accenture Virtual Experience Program on Forage, gaining hands-on experience in business and data analytics tasks.
